

## Task-1:

### **Kali Linux - Hands-on:**

Practice basic to advance Linux commands and try to install Kali Linux tools from GitHub in your Kali Linux and use it to perform any type of attack.

**Target site :** <http://testphp.vulnweb.com/>

Some of the basic to advance linux commands:

1.ls	11.ln	21.top	31.lscpu,pci,usb
2.cd	12.find	22.kill	32.ifconfig
3.pwd	13.chmod	23.pkill	33.netstat
4.mkdir	14.chown	24.grep	34.ss
5.rm	15.chgrp	25.uname	35.ssh
6.cp	16.umask	26.whoami	36.scp
7.mv	17.tar	27.df	37.wget
8.touch	18.gzip	28.du	38.curl
9.cat	19.zip	29.free	39.git clone
10.head	20.ps	30.uptime	40.apk-get etc....

## Some of the tools i have exported from github:

I have cloned some tools like :

1.phoneinfoga

2.breacher

3.scapy

4.yerisia

5.embomber

6.h8mail

7.I-see-you

8.pentbox

9.ufonet

10.raven-storm

11.ufonet etc..

```
[root@parrot]-[/home/lonewolf]
#ls
192.168.126.252 Documents hashes.txt pentbox sha.lst ufonet
Breacher Downloads I-See-You phoneinfoga sh.txt Videos
c1.pcap dump.pcap Music Pictures spiderfoot WhatBreach
c2.pcap EmBomber my.txt Public Templates yersinia.log
Desktop h8mail path Raven-Storm tools zphisher
[root@parrot]-[/home/lonewolf]
#
```

We are using a tool called : EmBomber/Zero-attacker

```
[lonewolf@parrot]~$ ls
192.168.126.252 Downloads I-See-You Pictures Templates zphisher
Breacher dump.pcap Music Public tools
c1.pcap EmBomber my.txt Raven-Storm ufonet
c2.pcap h8mail path sha.lst Videos
Desktop hashes.txt pentbox sh.txt WhatBreach
Documents iplocator phoneinfoga spiderfoot yersinia.log

[lonewolf@parrot]~$ cd EmB*
[lonewolf@parrot]~/EmBomber$ ls
Banner.txt EmBomber.py README.md Zero-attacker

[lonewolf@parrot]~/EmBomber$ cd Zero*
[lonewolf@parrot]~/EmBomber/Zero-attacker$ ls
1.jpg info.py LICENSE requirements.txt zero.py zero-tool.py
2.jpg install.bat README.md start.bat Zero-Tool

[lonewolf@parrot]~/EmBomber/Zero-attacker$ ./start.bat
```
