# Task-5:

Email Analysis: Take any email and analyse it,identify the red flags, and create the report on how to avoid such attacks.

In this i have clicked the view option and then on source of this mail where we can find whether this mail is genuine or not by analysing source…

By analysing source we can find from where we received this mail etc.. or we can say it's genuine or not.

🔒 **Epic AI Chip Battle: U.S. vs. China - The Tech War Heats Up!**

* first of all we must find whether this mail is from trusted source or not.

* By looking at the email of sender or some other details from the source we can identify spam mails and can mitigate our risk of getting into trap.

* Here in this mail the source and protocol are not secured so if we get mails like these the first thing we should do is to report these type of mails.

* we shouldn't register on every site we enter with our mails or contact details.

* we should'nt click on every mails we receive sometimes they may contains phishing links.

* These phishing links may look genuine but causes a lot of damage we must be careful while clicking links.
